

PERSICA

2025 SEASON

CHILEAN PATAGONIA

Hidden among millenary forests and snow capped mountains, surrounded by green landscapes and wildlife unique in Chilean Patagonia. A River of green and turquoise waters that receives in each tide a new batch of fresh salmon, The greatest attribute of this river is the real possibility of fishing king salmon in its most energetic, fresh and powerful state.

North Patagonia, with exceptional weather during the fishing season. In the morning we can have temperatures between 10° and 15°C the highest temperatures between 13:00 and 16:00hrs can easily reach 20°C. Making this place a privileged sector for salmon fishing at pleasant temperatures between February and April. Some occasional rainfall typical of Chilean Patagonia can refresh a fishing day.

As anglers and chileans we know these rivers perfectly, from their source in the Andes to their mouth in the fjord. 2025 will be Persica's ninth season with guests on these magnificent rivers, we know the dates and changes that have occurred on the rivers.

We have organized the best week for the different rivers, we know the changes that each year are presenting the salmon runs. Persica is all you need!
